

EASTERN SETCRETE *Private Limited*

An ISO 9001 : 2000 Company

MANUFACTURER OF CONSTRUCTION CHEMICALS

SETCRETE SB

PRODUCT DATA SHEET

POLYMER MODIFIED WATER RESISTANT REPAIR AND BONDING AGENT.

DESCRIPTION:

A milky synthetic latex emulsion which imparts bonding and waterproofing properties to cementitious mixes.

USES:

Setcrete SB has wide range of uses for waterproofing, as a grout admixture, in putties and in other forms in the repair and rehabilitation industry, rendering and tile fixing etc.

ADVANTAGES :

- Outstanding resistance to water and moisture.
- Excellent adhesion to a wide range of substrates.
- Improves flexibility of the treated area.
- Improves mechanical properties and abrasion resistance.
- Imparts chemical resistance to substrates.
- Low permeability makes mortars/concrete waterproof.
- Improves workability and adhesion of mortars.
- Strength remains unaffected.
- Resists freeze-thaw phenomenon in cold climates.
- Prevents finished surfaces from cracking.
- Improves bond to mother substrates.
- Weatherproofs walls from rising dampness/salt petre action.

APPLICATION:

Surface preparation : The substrate must be structurally sound, clear and dust free, oil, grease and contaminants must be removed mechanically. Smooth surface must be scrubbed, vacue-blasted and the rough surface should be damped with water prior to application of the bonding primer, modified mortar or concrete. All excess water should be removed from the surface.
