## SETFIX TA

### PRODUCT DATA SHEET

**SINGLE COMPONENT TILE ADHESIVE.**

#### DESCRIPTION:

Setfix TA is ready mix cement based waterproofing tile adhesive.

#### USES:

For the permanent fixing of ceramic and mosaic tiles on walls and floors.

#### ADVANTAGES:

- Easy to use, only water to be added.
- Excellent water proofing characteristics.
- Self-curing.
- Long working time.
- Good mechanical strength.

#### APPLICATION:

\* All surfaces should be sound, clean and free from any contamination like grease, oil, loose particles etc. Before application, the surface and tiles should be pre wetted properly. Mix two parts Setfix TA with one part water (by weight) and stir till a smooth paste is obtained. Allow the paste to stand for 4 to 5 minutes and stir again. Spread the paste on the surface to a uniform thickness of 3 to 4 mm. Place the tiles firmly into position by twisting action. Excess adhesive is to be removed by using damp cloth. Choose work area so that the tiles can be fixed within open wet time so that the paste which is approximately 20 minus. At 30 deg C. Powder should be added to water and not vice versa.

**COVERAGE:** \* 2.3 to 2.5 Sq. fit per kg.

**MIXING:** Setfix TA should be mixed with water in the ratio of 2:1 by weight. Water can be reduced or increased.
