MANUFACTURER OF CONSTRUCTION CHEMICALS

SETSHOT LAF

PRODUCT DATA SHEET

AN ALKALI FREE GUNITE AND SHOTCRETE ACCELERATOR IN LIQUID FORM.

DESCRIPTION :

Setshot LAF is a quicksetting as well as water Proofing agent available in liquid form for use in Wet Shotcreting/ Guniting.

USES:

- Wet shotcrete
- Grouting (back filling)
- Tunnels, Galleries, Milling.
- Slope stabilization, Pit Protection.
- Embankment and excavations.
- Concrete repair work.
- Shoring operation.
- Swimming Pool.

ADVANTAGES :

- Completely free from alkalis.
- Allows spraying to take place even on wet surface subject to slight infiltration.
- Speeds up the work and contributes to excellent water tightness of the sprayed concrete linings.
- Improves overhead spraying and reduces rebound.
- Completely free from chloride, nitrate, alkali aluminate, alkali silicate, alkali carbonate based formulations.
- Eliminates Alkali- Silica reaction even with reactive siliceous aggregate.

APPLICATION:

Setshot LAF to be added by means of a suitable dispensing pump.

Setshot LAF to be used normally 5% to 10% by weight of cement. However the optimum dosage should be determined by Lab/Site trial.
